# Return to work against epidemic and ensure safety

Now all industries have to resume work and production, the economy cannot stagnate, and people need to travel, so the question comes: how to effectively disinfect and prevent epidemics?

Langhe integrated Disinfection Device suitable for public areas like school, factory, hospital, supermarket, shopping mall, workshop, military etc.

# APPLICATION SCIENCE

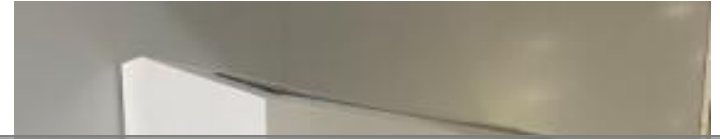

---

# disinfection

Food grade intelligent induction disinfection

- Quick disinfection of virus in the disinfection area
- food-grade disinfectant, safe and reliable
- can effectively kill various germs, intelligent induction spray, without manual operation

Convenient for shipping.

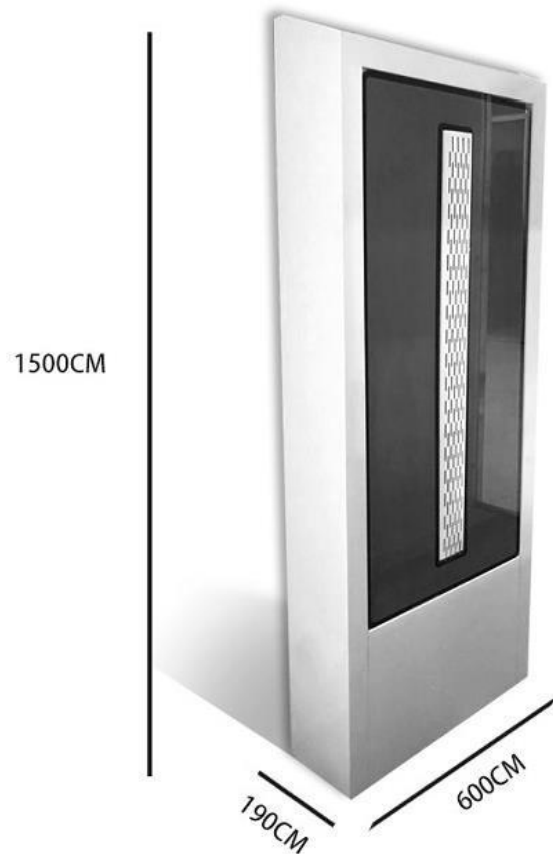

120 sets are able to be loaded into 1 \* 20GP shipping container

270 sets are able to be loaded into 1 \* 40HC shipping container

# Data information

## PRODUCT PARAMETERS

...

- Outside dimensions : 600\*190\*1500mm
- Spray method : Ultrasonic atomization
- Spray control method : Microwave induction start, delay stop  
(delay adjustable 5-60 seconds)
- Spray efficiency : 5L/H
- Disinfection tank capacity : 16L
- Disinfectant : 100-400PPM Diluted solution of chlorine dioxide、 50-200PPM Hypochlorous acid diluted solution
- Weight : 35kg
- Rated power : 800W
